Industrial Bioscience Expert Joins Agricultural BioTech Regulatory Network

The Agricultural BioTech Regulatory Network (ABTR Network) proudly announces Matthias Liebergesell as a new member consultant.

Dr. Liebergesell is founder and principal consultant at Liebergesell Regulatory Strategies, which specializes in global regulatory strategies and registration support for biological based products. His practice includes project evaluation, permits for movement and field testing of biomaterials, regulatory filings, regulatory management and study design, and training.

As global regulatory affairs leader at FMC Agricultural Solutions, Dr. Liebergesell successfully delivered regulatory strategies for crop protection chemicals and plant health biologicals supporting commercial registrations in the United States and Canada, Latin America, and the European Union. Prior to FMC, Matthias managed regulatory affairs at DuPont Industrial BioSciences and held biotech affairs and research positions at Pioneer Hi-Bred International. Certified as a Six Sigma Green Belt, Matthias has extensive experience in a range of chemicals, food and feed ingredients, cosmetic ingredients, and enzymes derived through fermentation of genetically engineered microorganisms. His ability to successfully lead global regulatory projects is well established over his 25-year career in the biotechnology industry.

“Matthias’s knowledge and expertise strengthens our global network in key commercial markets for bio-based products,” said Vickie Forster, ABTR Network Co-Founder. “We’re very pleased to welcome him to our network of regulatory experts.”

To learn more about Dr. Liebergesell and other network consultants, visit www.abtrnetwork.com.

Established in 2006, the ABTR Network is a unique global network of independent regulatory affairs managers/services serving the agricultural biotechnology industry from product conception through commercialization.

Services cover the entire range of regulatory support required for AgBiotech projects, including project management, project evaluation, risk assessments, contained/confined use permits; field trial permits / notifications; regulatory files; commercial permits; movement of biological materials; compliance audits; compliance systems; training; quality control; study design; documentation systems; regulatory strategies; regulatory management; issue management; communication; emergency response & public advocacy.

Visit www.abtrnetwork.com or e-mail info@abtrnetwork.com to learn more about the services we offer and how regulatory professionals can join.
